### **rev Teacher.s Guide - Strange Matter**

Comparison with mass. Matter should not be confused with mass, as the two are not the same in modern physics. Matter is a general term describing any 'physical substance'. By contrast, mass is not a substance but rather a quantitative property of matter and other substances or systems; various types of mass are defined within physics – including but not limited to rest mass, inertial mass ...

### **Matter - Wikipedia**

Condensed matter physics is the field of physics that deals with the macroscopic and microscopic physical properties of matter. In particular it is concerned with the "condensed" phases that appear whenever the number of constituents in a system is extremely large and the interactions between the constituents are strong.

### **Condensed matter physics - Wikipedia**

The study of self-propelled nanoparticles, although in its infancy, is important for nanoscale transport. – Synthesis of catalytic metallic nanomotors using wet-chemical methods provides an alternative to top-down lithographic methods.

Air is matter so it must be made up of molecules and atoms. It interacts with objects because we can see the trees swaying in the breeze. We also know it moves things since we can see the clouds moving in the sky and storms approaching us in the distance.
