2. Methods. A comprehensive search on the Web of Science database was conducted, using as key words "alkaline residues AND impact, management, production, alkalinity". The search was restricted initially to literature later than 2005, but older works were also considered as important references.

Heavy metals are generally defined as metals with relatively high densities, atomic weights, or atomic numbers. The criteria used, and whether metalloids are included, vary depending on the author and context. In metallurgy, for example, a heavy metal may be defined on the basis of density, whereas in physics the distinguishing criterion might be atomic number, while a chemist would likely be ...

Many of you have probably heard of the "alkaline diet"™. There are a few different versions of the acid-alkaline theory circulating the internet, but the basic claim is that the foods we eat leave behind an "ash"™ after they are metabolized, and this ash can be acid or alkaline (alkaline meaning more basic on the pH scale). According to the theory, it is in our best interest to make sure ...

Other metal ions (such as Pb<sup>2+</sup>, Cu<sup>2+</sup>, Al<sup>3+</sup> and Zn<sup>2+</sup>) will test only weakly acidic (3 < pH < 6). When a substance dissolves in water and causes an increase in the concentration of hydroxide ions (OH<sup>-</sup>), the substance is considered to be a base.

Uranium is a chemical element with symbol U and atomic number 92. It is a silvery-grey metal in the actinide series of the periodic table. A uranium atom has 92 protons and 92 electrons, of which 6 are valence electrons. Uranium is weakly radioactive because all isotopes of uranium are unstable, with half-lives varying between 159,200 years and 4.5 billion years.

It is the chlorine in municipal drinking water, sulphur in the concentrated protein of meat, fish, eggs and hard cheese, and phosphorous in meat and soft drinks that makes these foods so acidic. In general, a more vegetarian diet is more alkaline. It is a question of balance, and at present the balance is tilted too heavily in the direction of acid foods.

A number of references have proved that *S. cerevisiae* can remove toxic metals, recover precious metals and clean radionuclides from aqueous solutions to various extents. Schott and Gardner (1997) reported the

recovery of light metals, such as aluminium by *S. cerevisiae*. Brady et al. (1994f) proved that the yeast cells of *S. cerevisiae* treated with hot alkali were capable of accumulating a wide ...

Under Counter Fluoride Water Filters. All of our under counter water filters are placed out of the way, under the sink. They connect to the cold water line with an "EZ stop-valve connector" (not a leak-prone saddle valve like many competitors) and dispense water through an attractive long reach LEAD-FREE\* solid brass premium faucet (not a cheap plastic flip-lever like most of our competitors).
