Analytical Chemistry (ACS Publications)

An aqueous solution is a solution in which the solvent is water. It is mostly shown in chemical equations by appending (aq) to the relevant chemical formula. For example, a solution of table salt, or sodium chloride (NaCl), in water would be represented as $\text{Na}^+ + \text{Cl}^-$ (aq). The word aqueous (comes from aqua) means pertaining to, related to, similar to, or dissolved in, water.
