

complex numbers b s pdf

A complex number is a number of the form $a + bi$, where a and b are real numbers and i is an indeterminate satisfying $i^2 = -1$. For example, $2 + 3i$ is a complex number. A complex number may therefore be defined as a polynomial in the single indeterminate i , with the relation $i^2 + 1 = 0$ imposed. From this definition, complex numbers can be added or multiplied, using the addition and ...

Complex number - Wikipedia

Definition. A split-complex number is an ordered pair of real numbers, written in the form $x + yj$ where x and y are real numbers and the quantity j satisfies $j^2 = +1$. Choosing $j = \hat{i}$ results in the complex numbers. It is this sign change which distinguishes the split-complex numbers from the ordinary complex ones. The quantity j here is not a real number but an independent quantity.
