In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ...

### **ABSTRACT - Computer Engineering**

In mathematical optimization theory, duality or the duality principle is the principle that optimization problems may be viewed from either of two perspectives, the primal problem or the dual problem. The solution to the dual problem provides a lower bound to the solution of the primal (minimization) problem. However in general the optimal values of the primal and dual problems need not be equal.

NONLINEAR PROGRAMMING min  $x \in X f(x)$ , where  $f: n \rightarrow \mathbb{R}$  is a continuous (and usually differentiable) function of  $n$  variables  $x \in X$  is a subset of  $\mathbb{R}^n$  with a continuous character. If  $X = \mathbb{R}^n$ , the problem is called unconstrained. If  $f$  is linear and  $X$  is polyhedral, the problem is a linear programming problem. Otherwise it is a nonlinear programming problem

If  $f(x)$  is convex, then any local maximum is also a global maximum. However, in our optimization problems, we cannot assume that the negative objective

The Journal of Mathematical Analysis and Applications presents papers that treat mathematical analysis and its numerous applications. The journal emphasizes articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, and engineering, particularly those that stress analytical aspects and novel problems and their solutions.

Deep Learning ultimately is about finding a minimum that generalizes well -- with bonus points for finding one fast and reliably. Our workhorse, stochastic gradient descent (SGD), is a 60-year old algorithm (Robbins and Monro, 1951) [1], that is as essential to the current generation of Deep ...
