The following tables compare general and technical information for a number of relational database management systems. Please see the individual products' articles for further information.

### **Comparison of relational database management systems**

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.
