Microfabrication is the process of fabricating miniature structures of micrometre scales and smaller. Historically, the earliest microfabrication processes were used for integrated circuit fabrication, also known as "semiconductor manufacturing" or "semiconductor device fabrication". In the last two decades microelectromechanical systems (MEMS), microsystems (European usage), micromachines ...

The dependencies of AM techniques on related technologies such as material modeling, design tools, computing, and process design represent a challenge for both applied and basic research, shown in Fig. 1. In order to advance research interests and investment in AM technologies, some fundamental questions and trends in these avenues need highlighting.

3D printing is any of various processes in which material is joined or solidified under computer control to create a three-dimensional object, with material being added together (such as liquid molecules or powder grains being fused together). 3D printing is used in both rapid prototyping and additive manufacturing. Objects can be of almost any shape or geometry and typically are produced using ...

A resurgence of interest has propelled PCL back into the biomaterials arena with the birth of a new field, namely tissue engineering; a trend which is depicted graphically in Fig. 1. This huge resurgence of interest during the 1990s and 2000s has stemmed from the realization that PCL possesses superior rheological and viscoelastic properties over many of its resorbable-polymer counterparts ...
