Welding is a fabrication or sculptural process that joins materials, usually metals or thermoplastics, by using
high heat to melt the parts together and allowing them to cool causing fusion. Welding is distinct from lower
temperature metal-joining techniques such as brazing and soldering, which do not melt the base metal.. In
addition to melting the base metal, a filler material is typically ...

Thermal runaway occurs in situations where an increase in temperature changes the conditions in a way that
causes a further increase in temperature, often leading to a destructive result. It is a kind of uncontrolled
positive feedback.. In other words, "thermal runaway" describes a process which is accelerated by increased
temperature, in turn releasing energy that further increases temperature.

IMAPS is bringing together the entire microelectronics supply chain. The purpose of this Workshop organized
each year by IMAPS is to promote presentation and discussion of leading-edge developments in thermal
management components, materials, and systems solutions for removing, spreading, and dissipating heat
from microelectronic devices and systems.
