This book worked great with my class. Very similar to the previous edition so if you need to save money, you could get the older one. It's always recommended that if you've been assigned problems to check out the edition on reserve in your college library just to make sure the numbering hasn't changed.

A spreadsheet is an interactive computer application for organization, analysis and storage of data in tabular form. Spreadsheets developed as computerized analogs of paper accounting worksheets. The program operates on data entered in cells of a table. Each cell may contain either numeric or text data, or the results of formulas that automatically calculate and display a value based on the ...

We consider a random variable  $x$  and a data set  $S = \{x_1, x_2, \dots, x_n\}$  of size  $n$  which contains possible values of  $x$ . The data set can represent either the population being studied or a sample drawn from the population. Looking at  $S$  as representing a distribution, the skewness of  $S$  is a measure of symmetry while kurtosis is a measure of peakedness of the data in  $S$ .
