A fire station (also called a fire house, fire hall, firemen's hall, or engine house) is a structure or other area for storing firefighting apparatus such as fire engines and related vehicles, personal protective equipment, fire hoses and other specialized equipment. Fire stations frequently contain working and living space for the firefighters and support staff.

Fire station - Wikipedia

Watts Water Technologies, through its subsidiaries, is a global provider of plumbing, heating, and water quality solutions for residential, industrial, municipal, and commercial settings. Our family of companies offers the most extensive plumbing, heating, and water quality product lines for hotels and resorts of all sizes, service levels and chain scale segments.

National Association of Hotel & Lodging Engineers

Passive fire protection materials insulate steel structures from the effects of the high temperatures that may be generated in fire. They can be divided into two types, non-reactive, of which the most common types are boards and sprays, and reactive, of which thin film intumescent coatings are the most common example. Thin film intumescent coatings can be either on-site or off-site applied.
