After the fire - Advice to clients about what to do in the hours after a fire strikes.

Tasmania Fire Service

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire, such as one which has reached the ceiling, endangers the user (i.e., no escape route, smoke, explosion hazard, etc.), or otherwise requires the expertise of a fire brigade.

A fire sprinkler system is an active fire protection method, consisting of a water supply system, providing adequate pressure and flowrate to a water distribution piping system, onto which fire sprinklers are connected. Although historically only used in factories and large commercial buildings, systems for homes and small buildings are now available at a cost-effective price.

The Danger. The potential for a major wildland fire incident is present in Scottsdale throughout most of the year. The threat increases dramatically during the summer months, and often peaks around the 4th of July holiday, when the highest sales and use of consumer fireworks is expected. Beyond the risk of fire danger, is the potential for burns and traumatic firework injuries.
