Cone meters are a newer differential pressure metering device first launched in 1985 by McCrometer in Hemet, CA. The cone meter is a generic yet robust differential pressure (DP) meter that has shown to be resistant to effects of asymmetric and swirling flow.

Overview. Portasonic 2.FL0 is the second generation ultrasonic flow meter for accurate flow measurement from outside a pipe. The 2018 model received an upgrade from the original Portasonic in terms of aesthetics, accuracy and ease of use. It is a highly competitive ultrasonic transit time flow meter: able to accurately, reliably and quickly identify the rate of flow in pipework and make ...

Airflow, or air flow is the movement of air from one area to another. The primary cause of airflow is the existence of pressure gradients. Air behaves in a fluid manner, meaning particles naturally flow from areas of higher pressure to those where the pressure is lower. Atmospheric air pressure is directly related to altitude, temperature, and composition.

### **Airflow - Wikipedia**

Highlights Used computational fluid dynamics to model 4 differential pressure flow meters. Examined how the discharge coefficient changed with respect to Reynolds number. Discharge coefficients decreased as Reynolds number decreased, except for orifice. Orifice plate coefficient exhibits a local maximum near a Reynolds number of 300.

Gas Absorption Column Apparatus Item code: 11935 The absorption column is designed to demonstrate the basics of gas absorption in the unit operations of chemical engineering. A glass absorption column is used to allow mass transfer between the absorption liquid and feed gases within the unit.

NovoCyte <sup>Å</sup>® is a high performance benchtop flow cytometer designed for all levels of users and all types of laboratories. This budget-friendly instrument is capable of detecting up to 17 parameters with enhanced sensitivity and resolution. The customizable laser and optical configurations of NovoCyte offer a high degree of flexibility while providing complex cell analysis capabilities.

Measure water flow rate: how to measure water quantity delivered per minute at building plumbing systems. This article describes procedures for measuring the flow rate in gallons per minute or liters per minute at a building faucet or plumbing fixture. We explain what fixture flow rate means and we warn that measuring water flow in or at a building may give quite misleading data about the ...
