Since the discovery of lncRNAs, numerous studies have revealed multiple functions for such transcripts. For example, lncRNAs have been shown to be involved in the transcription and translation of mRNAs , the regulation of gene expression and splicing mechanisms , and have also been implicated in imprinting and dosage compensation ().Furthermore, a link between aberrant expression of lncRNAs ...

The study of the functional neuroanatomical bases that drive meditation's apparently salutary effects remains in its infancy, however. This is all the more true of research examining putative differences in the anatomical structure of the brains of meditation practitioners. Although many studies have examined meditation with functional methods such as electroencephalography (EEG), event ...

Is meditation associated with altered brain structure? A

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
