Geoprofessions is a term coined by the Geoprofessional Business Association to connote various technical disciplines that involve engineering, earth and environmental services applied to below-ground (â€œsubsurfaceâ€•), ground-surface, and ground-surface-connected conditions, structures, or formations. The principal disciplines include, as major categories:

Geoprofessions - Wikipedia

A foundation is the element of a structure which connects it to the ground, and transfers loads from the structure to the ground. Foundations are generally considered either shallow or deep. Foundation engineering is the application of soil mechanics and rock mechanics (Geotechnical engineering) in the design of foundation elements of structures.
