Cartesian Co-ordinate System : A point P(x, y, z) in Cartesian co-ordinate system is represented as intersection of three planes x = constant, y = constant and z = constant, as shown in the figure below. The unit vectors along the three axes are as shown in the figure. Coordinate system represented by (x,y,z) that are three orthogonal vectors in straight lines that intersect at

Crystal radio was invented by a long, partly obscure chain of discoveries in the late 19th century that gradually evolved into more and more practical radio receivers in the early 20th century. The earliest practical use of crystal radio was to receive Morse code radio signals transmitted from spark-gap transmitters by early amateur radio experimenters.
