COMPANY PROFILE 2017 We believe that AI can be of great value to doctors. VUNO products will not only provide improved workflow but a whole new user experience.

COMPANY PROFILE 2017 - VUNO Inc.

Summary In this talk I begin noticing that while ignoring the crucial role of temporal coherence, the formulation of most of nowadays current computer vision recognition tasks leads to tackle a problem that is remarkably more difficult than the one nature has prepared for humans.

Course Description  2nd International Summer School on

INTRODUCTION. Silicosis refers to a spectrum of pulmonary diseases caused by inhalation of free crystalline silica (silicon dioxide). The written record of occupational lung disease caused by silica inhalation extends back to ancient Egypt and Greece.

Silicosis - UpToDate

Abstract: Congenital abnormalities can develop at any time after the first month of pregnancy. From conception to birth, the embryo, and the fetus have to adapt, at a molecular and transcriptional level, to various changes in their cellular milieu .

Abstract Asbestosis is defined as diffuse pulmonary fibrosis caused by the inhalation of excessive amounts of asbestos fibers. Pathologically, both pulmonary fibrosis of a particular pattern and evidence of excess asbestos in the lungs must be present. Clinically, the disease usually progresses slowly, with a typical latent period of more than 20 years from first exposure to onset of symptoms.

Asbestosis is long term inflammation and scarring of the lungs due to asbestos. Symptoms may include shortness of breath, cough, wheezing, and chest pain. Complications may include lung cancer, mesothelioma, and pulmonary heart disease.. Asbestosis is caused by breathing in asbestos fibers. Generally it requires a relatively large exposure over a long period of time.

Asbestosis - Wikipedia

Abstract. Idiopathic pulmonary fibrosis (IPF) is a disease of unknown etiology with considerable morbidity and mortality. Cigarette smoking is one of the most recognized risk factors for development of IPF.

Diffuse panbronchiolitis (DPB) is an inflammatory lung disease of unknown cause. It is a severe, progressive form of bronchiolitis, an inflammatory condition of the bronchioles (small air passages in the lungs). The term diffuse signifies that lesions appear throughout both lungs, while panbronchiolitis refers to inflammation found in all layers of the respiratory bronchioles (those involved ...

Diffuse panbronchiolitis - Wikipedia

Silicon Dioxide is a natural compound of silicon and oxygen found mostly in sand, Silica has three main crystalline varieties: quartz, tridymite, and cristobalite. Fine particulate silica dust from quartz rock causes over a long-term progressive lung injury, silicosis.

Analysis of multiple lung parenchymal abnormalities on HRCT is a real diagnostic challenge. These abnormalities may be due to a disease of the pulmonary interstitial tissue, the bronchial tree, the cardiovascular system or to abnormal alveolar filling with fluid, blood, cells or tumor, several of these etiologies possibly being concomitant.

Multiple lung parenchymal abnormalities: Don't panic, let

Asthma is a common chronic disease worldwide and affects approximately 24 million persons in the United States. It is the most common chronic disease in childhood, affecting an estimated 7 million children.
