General relativity (GR, also known as the general theory of relativity or GTR) is the geometric theory of gravitation published by Albert Einstein in 1915 and the current description of gravitation in modern physics. General relativity generalizes special relativity and Newton's law of universal gravitation, providing a unified description of gravity as a geometric property of space and time ...

### General relativity - Wikipedia

This formula states that the equivalent energy (E) can be calculated as the mass (m) multiplied by the speed of light (c = about 3 × 10<sup>8</sup> m/s) squared. Similarly, anything having energy exhibits a corresponding mass m given by its energy E divided by the speed of light squared c<sup>2</sup>. Because the speed of light is a very large number in everyday units, the formula implies that even an everyday ...

### Spazio-tempo di Schwarzschild - Wikipedia

Lo spazio-tempo di Schwarzschild,  $\tilde{A}$  una soluzione delle equazioni di campo di Einstein nel vuoto, che descrive lo spazio-tempo attorno a una massa sferica, non rotante e priva di carica elettrica.  $\tilde{A}$  stata la prima soluzione trovata per la relatività generale, pochi mesi dopo la sua pubblicazione.

### Thermal decomposition of ammonium perchlorate

This review represents an attempt to summarize literature data on thermal decomposition of ammonium perchlorate. The mechanism of thermal decomposition and various factors which influence on the thermal decomposition of ammonium perchlorate are discussed.
