Nearly all animals make use of some form of sexual reproduction. They produce haploid gametes by meiosis; the smaller, motile gametes are spermatozoa and the larger, non-motile gametes are ova. These fuse to form zygotes, which develop via mitosis into a hollow sphere, called a blastula. In sponges, blastula larvae swim to a new location, attach to the seabed, and develop into a new sponge.

A classification model (classifier or diagnosis) is a mapping of instances between certain classes/groups. The classifier or diagnosis result can be a real value (continuous output), in which case the classifier boundary between classes must be determined by a threshold value (for instance, to determine whether a person has hypertension based on a blood pressure measure).

L'adaptation au changement climatique désigne les stratégies, initiatives et mesures visant à réduire la vulnérabilité des systèmes naturels et humains contre les effets (présents et attendus) des changements climatiques [1]. Le mot adaptation évoque une aptitude à s'ajuster, et donc une vision dynamique voire évolutive du fonctionnement des sociétés.
