SQL Server 2005 T-SQL Recipes: A Problem-Solution Approach

The travelling salesman problem (TSP) asks the following question: "Given a list of cities and the distances between each pair of cities, what is the shortest possible route that visits each city and returns to the origin city?" It is an NP-hard problem in combinatorial optimization, important in operations research and theoretical computer science. ...

Travelling salesman problem - Wikipedia

A problem statement is a concise description of an issue to be addressed or a condition to be improved upon. It identifies the gap between the current (problem) state and desired (goal) state of a process or product. Focusing on the facts, the problem statement should be designed to address the 5 Ws – who, what, where, when, and why. The first condition of solving a problem is ...
