

product process design principles pdf

A core component of Lean Startup methodology is the build-measure-learn feedback loop. The first step is figuring out the problem that needs to be solved and then developing a minimum viable product (MVP) to begin the process of learning as quickly as possible.

The Lean Startup | Methodology

Design is the creation of a plan or convention for the construction of an object, system or measurable human interaction. Design has different connotations in different fields (see design disciplines below). In some cases, the direct construction of an object (as in pottery, engineering, management, coding, and graphic design) is also considered to use design thinking.

Design - Wikipedia

The engineering design process is a methodical series of steps that engineers use in creating functional products and processes. The process is highly iterative - parts of the process often need to be repeated many times before another can be entered - though the part(s) that get iterated and the number of such cycles in any given project may vary.

Engineering design process - Wikipedia

Product Design involves a broad approach to the designing and making of innovative / new products. Pupils/students studying Product Design should work closely with other sections of the site including the Resistant Materials, Design Process, Equipment and Processes and Electronics sections. The Graphics section may also be of interest.
