### **CALCULUS.ORG**

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

In mathematical modeling, statistical modeling and experimental sciences, the values of dependent variables depend on the values of independent variables. The dependent variables represent the output or outcome whose variation is being studied. The independent variables, also known in a statistical context as regressors, represent inputs or causes, that is, potential reasons for variation.

## Dependent and independent variables - Wikipedia

Diferenciación y diferenciabilidad. Una función de una variable es diferenciable en un punto si su derivada existe en ese punto; una función es diferenciable en un intervalo si lo es en cada punto perteneciente al intervalo. Si una función no es continua en  $c$ , entonces no puede ser diferenciable en  $c$ ; sin embargo, aunque una función sea continua en  $c$ , puede no ser diferenciable.
