Dissociative disorders may also lead to criminal acts. In Germany, a screening study was conducted on 51 male criminal offenders admitted to a medicolegal institution by the court so as to understand diminished or lack of responsibility for the offence due to psychiatric disorder, including a large group of persons with substance-use disorders [].

Epidemiology of Dissociative Disorders: An Overview

Dissociative identity disorder (DID), formerly known as multiple personality disorder, is a mental disorder characterized by at least two distinct and relatively enduring personality states. There is often trouble remembering certain events, beyond what would be explained by ordinary forgetfulness. These states alternately show in a person's behavior; presentations, however, are variable.
