History. Its activity was first identified in 1876 by Frédéric Alphonse Musculus as a soluble ferment. In 1926, James B. Sumner, showed that urease is a protein by examining its crystallized form. Sumner's work was the first demonstration that a protein can function as an enzyme and led eventually to the recognition that most enzymes are in fact proteins.

Isotopic labeling (or isotopic labelling) is a technique used to track the passage of an isotope (an atom with a detectable variation in neutron count) through a reaction, metabolic pathway, or cell. The reactant is 'labeled' by replacing specific atoms by their isotope. The reactant is then allowed to undergo the reaction. The position of the isotopes in the products is measured to determine ...

Below you will find my initial comments (there will likely be more after some reflection) and draft answers to the 2014 Free Response questions that were released by the College Board earlier today. As ever, these are in draft form and I would be happy to receive comments and corrections. General comments Based upon the [!]

2014 Released Free Response Comments & (draft) Answers

In Chapter 4 "Reactions in Aqueous Solution", you learned that in an acid–base titration, a buret is used to

deliver measured volumes of an acid or a base solution of known concentration (the titrant) to a flask that contains a solution of a base or an acid, respectively, of unknown concentration (the unknown). If the concentration of the titrant is known, then the concentration of the ...

Acid-Base Titrations

1.. Introduction Catalyst deactivation, the loss over time of catalytic activity and/or selectivity, is a problem of great and continuing concern in the practice of industrial catalytic processes.
