the world's urban population by 2050, with almost 90 % of this growth happening in Asia and Africa. Just three countries – India, China and Nigeria – together are expected to account for 35 % of the growth in the world's urban population between 2018 and 2050.

World Urbanization Prospects: The 2018 - population.un.org

Policies in poorer nations faced with overwhelming population increases have ranged from the systematic introduction of contraception and the distribution of birth-control information and supplies, with moderate success, to draconian government regulations imposing sterility, to the furthest extreme, the totalitarian one-child policy in China.

World Population Policies: Their Origin, Evolution, and

Nutrition and population changes are intimately linked in several ways. First, a population's ability to nourish itself is a major factor in fertility and mortality rates. Maternal nutritional status affects fecundity, and hence fertility. This relationship has been observed during famines, when birth rates drop markedly.

Nutrition and Population - UNSCN

Population Policies Definition: Population policies to influence population growth and distribution involve a wide range of decisions and actions by governments, both direct and indirect, which influence individual and family decisions regarding marriage and childbearing, working arrangements, place of residence, etc.
