Contingency management (CM) is most-widely used in the field of substance abuse, often implemented as part of clinical behavior analysis. CM refers to the application of the three-term contingency (or operant conditioning), which uses stimulus control and positive reinforcement to change behavior. Patients' behaviors are rewarded (or, less often, punished); generally, adherence to or failure to ...

Risk is the possibility of losing something of value. Values (such as physical health, social status, emotional well-being, or financial wealth) can be gained or lost when taking risk resulting from a given action or inaction, foreseen or unforeseen (planned or not planned). Risk can also be defined as the intentional interaction with uncertainty. ...
